*What Can It Be?*

"I can't eat—I can't sleep! I don't wanna walk—I don't wanna talk! I know I'm not lazy—I hope I'm not crazy! Everything seems rosy red—this blame thing has gone to my head! It has me dizzy; it has me dizzy; I put salt in my coffee, pepper in tea. Oh, gosh! I wonder what'll become of me. I don't know what's the matter—this heart of mine goes pitter patter."

**Oh! Now I know:**

**"It Must Be Love"**

**Coming Next Wed., June 29th**

**"MONS"**

## PROGRAMME

**For Diamond Jubilee Celebration at  
Champion, Friday, July 1st**

**10.00 A.M. Parade--Pageant**

The Patriotic Program and Flag Salute to be put on by all the school children of the district and surrounding community. The order of procession will be: Parade Marshall, Miss Canada; Band; Mayor and Council in cars, School Children representing the nine different Provinces of Canada, carrying banners; Floats, Cars, Clowns, etc.

The parade will assemble on the road leading from Mr. Sommers' home to Mrs. Linton's, proceed to the United Church, then west to Railroad Ave., south to hotel, east through Main Street to Park, north one block, west one block, south two blocks, west one block to Railroad Ave., north to hotel and thence east to Fair Grounds, where a platform will be erected for the balance of the program.

Entries requested in all events.

### Officers and Committees

Chairman—J. M. Moffatt.  
Secretary—H. Cooper.  
School Programme—H. J. Hofford.  
Grounds Committee—A. W. Jopling.  
A. McIntyre.  
Advertising Committee—G. M. Campbell, B. N. Woodhull.  
Ball Game Committee—G. L. Depeu, D. W. Hager.

Stamper and Race Committee—P. M. Patterson, G. F. Smith, Arthur Hopkins, C. E. Anderson.  
Sports Committee—Herbert Gill, F. W. Clever.  
Fireworks Committee—H. Hamill.  
Dance in charge of—Women's Institute.  
Sunday Programme—Ladies' Aid.

The Ladies' Aid with the help of the community, will serve lunch on the grounds and a hot dinner in the church on Friday, July 1st. Dinner will be served from four o'clock on at 50¢ per person. All donations for this will be thankfully received and may be left with Mrs. G. A. Mandard or at the church.

The Women's Institute, in charge of the decorations for July 1st, request the co-operation of householders in town

by the decoration of their residences with flags and bunting for the occasion. It is to be hoped the request will be met by a general effort to make the whole town look as gay as possible for the Diamond Jubilee Celebration.

Among the attractions on July 1st will be the big electrical orthophonic Victrola, which will be operated on the grounds power being supplied from J. M. Moffatt's engine. It is one of the finest instruments ever brought to the country.

All school children admitted to grounds free. Adults \$1.00. No raffish or gaming devices of any kind in this event.

E. Latiff's new pool room is now open and is being well patronized by the public. The equipment includes four snooker tables, two of them new, while the old tables have been reconditioned so thoroughly they are as good as new.

**Hatchway**  
**No-Button Underwear**

**For Men**

**Also Boys' Sizes**

**From 24 to 32**

**There's Better Cloth  
In Hatchway**

It washes softer, is more absorbent and being closely woven gives an extra season's wear.

**We are exclusive agents  
for Hatchway Underwear**

Phone 9 **JOPLINGS** Phone 9

**For Men's Wear and Groceries**

**WE SELL THE BETTER GRADE  
TO BUILD A BETTER TRADE**

### Testimonial From a Cow

Ever since calfhood I've suffered all kinds of discomfort and agony during the summer months from fly and mosquito bites. My owner tried every kind of spray and insect repellent on the market, but even the best of them only gave very temporary relief. I was always timid each time I knew I was to be sprayed because the stuff made my eyes smart, irritated my skin and made me look a sight by discoloring my nice white hide. My appetite was affected and I simply couldn't keep up a normal supply of milk; I was completely discouraged. One day last summer when the flies were at their very worst, a man came along with a new discovery he called FLY X-IT, and persuaded my owner to allow him to use same on me. To make a long story short, I'll just say that my troubles from all kinds of flies are over. I only have to take time about twice a week to be sprayed. The solution smells nice and it's so soothing to my nose and eyes.

The only worry I have now is for my poor brother and sister animals that haven't had an opportunity of using FLY X-IT. While there are now "No Flies on Me" they must be bothering the life out of others less fortunate.

Please see that my owner keeps a supply on hand, for I can't produce beef or milk without it.

Yours truly, (Sgd.) ANY COW

NOTE—For Mosquitoes Also.

THURSDAY, JUNE 23, 1927

## NOTES AND COMMENT.

Any opposition there is to the Wheat Pool lies with the old line companies, which naturally wish to retain their business. It is very doubtful, however, if some of the enthusiastic supporters of the Pool do not go so far as to be a doubtful asset in promoting Pool interests. To suggest that the change in Alberta's situation since 1923 is entirely due to the operation of the Pool is ridiculous and still it is being made in many quarters. Even the Pool must have wheat to sell, and naturally the fact that production has been fairly satisfactory of late years is the prime factor in the contentment we hear so much about. If the Pool can claim to have saved the amount withdrawn from the sellers for elevator purposes it would have been a fairly successful venture and should retain the support it had achieved. When the farmer is asked to believe miraculous results have been achieved by the pool, practically a control of world prices and almost control of the business per acre produced by the farmers, skepticism must naturally be aroused.

At the launching of the "Sign Up" campaign in Calgary Senator Buchanan, of Lethbridge, summarized all that is reasonably claimed for the Pool when he said: "I think and believe that this Pool movement is a creation of value and has done a great deal to stabilize agriculture in this Province and provide a means of orderly marketing and to give the farmers a chance to receive a return from their crops in an orderly and regular way throughout the year, instead of being at the beginning of season's work should be our desire to support wholeheartedly any move that aims to bring in to the pockets of the farmers more money, and I believe the Wheat Pool is succeeding in that endeavor, and I am supporting the Pool in its objective because it is an advantage to me as a business man, and to the whole of the Province."

More painting is being done in town this spring than for some years past and the effect produced is decidedly pleasing. A brighter-up idea of this kind which becomes more or less general is a great thing for appearances, and even if the suggestion of prosperity, like the paint, is largely on the surface, the general effect is good for the nerves, at least.

The oldest inhabitant is not suggesting that this country ever looked better than it does this spring. Most anything we have experienced in recent years could be likened to 19 and so and so, but the coating of green covering the ground now would be hard to equal under any circumstances and almost impossible to excel.

With arrangements practically completed there is no hesitation in assuring the public that the Diamond Jubilee Celebration will be fittingly

observed in Champion with one of the best programmes ever put on in this part of the country. You can make no mistake in coming to Champion for July 1st.

All roads will lead to Champion on July 1st.

TO  
Give You Service

The U.G.G. Elevator at your station is there to give you service, both in handling your grain and in furnishing farm supplies.

These farmer-owned elevators mean better returns for you in price and grade. The U.G.G. elevators set a standard which other companies have to meet.

U.G.G. elevators are there for the use and benefit of all farmers alike. Shareholders in the Company and farmers who are not shareholders all get the same service and treatment.

We don't claim to be perfect, but we do claim—and we believe justly—that the service given by U.G.G. elevators and by all departments of the business brings real financial benefit to farmers.

If you agree that this is a fair claim, we shall appreciate your business at your nearest U.G.G. Elevator.

Is There a Special Paint for  
Every Purpose?

You cannot get good results by using the same paint for all purposes.

The Paint that is made to withstand severe weather conditions outside, will not give the best service on a floor.

We have studied Paint, have watched it under tests, and have selected the Brand of Paint we consider The Best for every use.

S.W.P. Outside Paints for your home.

S.W.P. Crosse Paints for your barns and roofs.

S.W.P. Barn Red.

Will serve you under all conditions.

There are cheap paints on the market, but are they cheap?

Our experience has been that you use so much more paint to get the results that you pay as much if not more in the end and besides you get a paint that does not stand the acid test of time. Our aim is to give you service by giving you advice as to mixing and selecting the right paint for the purpose.

Our stock is complete, and our service is free for the asking.

There is no substitute for quality.

# Discovering Ways and Means Of Making Northern Hinterland An Integral Part Of Canada

Since Confederation the wilderness frontier of Canada has entirely shifted. Then the prairies, which now send a substantial representation to the House of Commons, were known only to Indians, fur traders, mission-aries and a few explorers. The first task of the newly formed Canadian government was to arrange for a transcontinental railway to link up the infant settlement in British Columbia; and as active men as Edward Blake argued earnestly against the folly of wasting money laying a rail road across such permanently uninhabitable areas as the southern marshes of the present provinces of Manitoba, Saskatchewan and Alberta. As late as 1871 Sir William Wilfrid wrote a famous description of the country as the present city of Prince Albert to prove that Europeans could never live there, the year round.

The wealth and habitability of the northern prairies are now common knowledge. Today the path to northern Quebec and Ontario has been opened. Settlers are raising vegetables, grains, cattle and even fruits far north of Hamilton, Ont. The Shewan River to the north of Edmonton the fertile Peace River Valley is rewarded to the pioneers. The push to the north is continuing, and it is on its way. We do not predict what, in the course of the century, will be the settlement of these great northern regions, which have been almost virgin.

The Arctic and sub-arctic plains alone remain a challenge to the pioneer. Already, thanks largely to Stefansson, this vast expanse is being explored by geologists. There are one and one-half million square miles of grazing lands, with a native moose, horses, ferns and 762 species of flowering plants. Values in furs, herds, and in Alaska the annual catch of fish now far exceeds the products of the mines in value; and Canada's Arctic waters teem with fish.

The reindeer industry in Alaska has proved so profitable that London & Co., alone ship some 100,000 reindeer a year. The Government has been raising reindeer the southern half of Baffin Island—an area the size of the British Isles. If the reindeer industry is carried out, a new source of food will be available that will put to profitable use great tracts of our far north. On Baffin Island, for example, the reindeer has been found between Fort Norman and the Arctic Circle.

Only time will tell. But the Canadian Polar regions are not as cold as Siberia, which is being colonized by cold. And as the reindeer industry on the Arctic Coast once presented terrible difficulties to the French colonists, and yesterday that of the southern prairie seemed a hopeless task, it is no obstacle to our fathers, on the belief, in which we were brought up, that the Far North was an impenetrable region of perpetual snow. It is the light of scientific knowledge that the whole of Canada is habitable and fertile. One of the chief problems of the younger generation is to discover ways and means of making the north an integral part of Canada, instead of the hinterland it has been.

**How He Knows**  
"You are a traveler, eh," said a passenger in a local train, "and you happen to be familiar with Mind Vixen?"  
"Yes," said the other passenger, "I call there on every trip."  
Glad to hear it, I've never been there. Which hotel would you advise me to stop at?  
"The Majestic."  
"Do you always stop there?"  
"No, I've never stopped there, but I've been to all the others—Hotel Breckenridge News."

**Imperial Solidarity**  
The vast majority of Canadians will be pleased to see Canada and the Motherland raised side by side, not through unrequited imperial loyalty, but because it is evident that in this matter the two Governments think along identical lines, deduce similar conclusions, and adopt similar courses. That is proof of imperial solidarity stronger than the other us thinking sort.

Fifty men and women students at the Homeopathic Medical College of New York, have volunteered to be slung by hoists and blimp balloons in an attempt to determine whether the venom can be put to some useful purpose.

## Modern Town Planning

In Some Cases Very Little Attention Paid To New Science  
The Town Planning Institute of Canada, at its seventh annual convention in Toronto has resolved that it commends the efforts of those users of Industrial Towns in Canada who have adopted methods of modern town planning in the development of their areas for industrial and social life.

However, the institute in convention, cannot but observe, that in some cases, even in the case of the best, the recognition is being paid to the fact that a new science of town planning has been born which is attracting the attention of the whole civilized world and has amply proved its efficiency both from an economical and social point of view.

It is being pointed out that certain forms of town planning such as followed the industrial era in the older countries from which these countries are now trying to escape at a vast expenditure of national funds, which produced intolerable suffering, misery and broken health among the victims of such developments and created irredeemable areas of squalor, which have remained a disgrace to civilization.

The institute would appeal to the Provincial Legislatures to protect the citizens of Canada by exercising town planning control over all new towns and establishing the principle that the interests of the mass life and has less important than the interests of industry.

## Benefit of Cadet Training

Value Should be Clearly Apparent Even to Parents  
Any kind of training that teaches growing boys to be respectful to their elders, to address them as "sir", and learn that it is the part of a gentleman to be courteous, is not only valuable to the community, but quite necessary for the rising generation. When in politics is added an up and down, challenges the person, and care of their apparel, the value of such training ought to be clearly apparent even to the parents.

That is what cadet training in the schools does for the boys. All who have had experience will testify to the splendid results obtained in deportment and discipline. To teach boys to act like gentlemen and to be able to stand up for themselves is one of the most important lessons that they can learn. It is part of the equipment necessary for success in life, and besides it makes them more tractable at home and more capable of leadership. That is the value of cadet training. It is a pure invention of the Communists and they know it.

Barstler—"What possible excuse did you fellows have for acquiring that under?"  
Juryman—"Excuse?"  
"Really? The whole twelve of you?"

The first savings bank was founded in Scotland by the Rev. John Duncan in 1810.

**A Flock of Youthful Snarriers**  
The modish use of two materials this season is effectively shown in View A of this charming fur coat, suitable for miles and small women. The pointed collar, opening at the back, has a V neck and shawl collar and is joined to the dress, employing the decorative material on the lapels, cuffs at front and back. The long half-length sleeves are finished with shawl cuffs, and a narrow belt fastens in front. View B is the same coat, but in a material, with the collar and cuffs and the edge of the V neck and short sleeves bound. No. 152 is in sizes 16, 18 and 20 years. View A, size 18 (45 bust), requires 2 1/2 yards 24-inch material for dress and 1 1/2 yards contrasting for plaids and trimmings. View B, size 18 (45 bust), requires 2 1/2 yards 24-inch material, or 2 1/2 yards 18-inch. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and latest in dress styles, will be of interest to every home dressmaker. Price of the book is 10 cents the pattern.

## Finishing Lambs for Market

Good Quality Alfalfa the Most Valuable Roughage

The price of finishing lambs for market has been receiving a good deal of attention at the Indian Head, Saskatchewan, Experimental Farm, and recently of the investigations have been given in the reports of the superintendent. He stresses the fact in selecting feeder lambs for finishing, good type, growthiness and thriftiness are the primary considerations. It must be remembered that lambs, when they are put on the subject to have a discount when marketed. For finishing lambs good quality alfalfa is the most valuable roughage. When it is not available, oat hay or hay from other cultivated grasses can be used to good advantage in conjunction with corn silage and roots. Crops are recognized as the standard grain for sheep, but a little barley may be added. It is generally considered good practice to give the feed or lambs a few weeks on good roughage before the run of a grain field after the crop has been removed, preparing to put them on the feed lot for fattening. For fattening, the roughage should be steady in quantity and quality, no more being fed than the lambs will clean up. The grain ration should start at 1/2 a pound per day and gradually increase to 1 1/2 pounds. The latest report of the superintendent may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

**Ayres at Coast Are Being Deported**  
Operation Carried Out by Principal Owners in British Columbia  
While Ayres breeders in Eastern Canada are still discussing in tones of awe and astonishment the advice of Adam Munger, the noted St. John's Ayres breeder to deplore their cattle, British Columbia Ayres have taken action, and the beautiful carved and highly polished horses that have been such a characteristic feature of the breed will be making their way to the coast provinces where they are led into the show ring at the fair this fall.

A resolution to deplore all animals was passed without dissent at the last annual meeting of the British Columbia Ayres Breeders' Association, and although the cold spring caused some delay in putting this decision into effect, the operation has now been carried out in most of the principal herds. Shannon Bros. deplored the members of the well-known Grandview herd some weeks ago, a similar view was expressed at Pelly a little later, and now the famous Edelman herd of E. A. Wells and Sons, at Sardis are being deplored.

Canadian soldiers, leading an American mission, found some interesting broken white chests, which they broke open with rifle bullets, and when the animals were killed, the soldiers left hurriedly.

"Haven't I seen your face somewhere?"  
"Very likely—it goes about with me a good deal."

Excessive rains soaked the wood of a flock of sheep near Red Lake, Ont., and when the animals were killed, the stacks of hay were found to be water-soaked, and the sheep were found to be water-soaked.

Spectacles have been prescribed for a near-sighted balloon in the Circus last year.

**Old-Timers Meet After 40 Years**  
From the East. As indicated in the photograph, the old-timers met at the Barnhart, conductor of the first train; P. H. Hargrave, driver of the first train; (4) George Moore, roadmaster, the only man now alive who was present at the driving of the first passenger train over Canadian Pacific or any other line into Vancouver from the East.

From the West. As indicated in the photograph, the old-timers met at the Barnhart, conductor of the first train; P. H. Hargrave, driver of the first train; (4) George Moore, roadmaster, the only man now alive who was present at the driving of the first passenger train over Canadian Pacific or any other line into Vancouver from the West.

From the North. As indicated in the photograph, the old-timers met at the Barnhart, conductor of the first train; P. H. Hargrave, driver of the first train; (4) George Moore, roadmaster, the only man now alive who was present at the driving of the first passenger train over Canadian Pacific or any other line into Vancouver from the North.

From the South. As indicated in the photograph, the old-timers met at the Barnhart, conductor of the first train; P. H. Hargrave, driver of the first train; (4) George Moore, roadmaster, the only man now alive who was present at the driving of the first passenger train over Canadian Pacific or any other line into Vancouver from the South.

From the East. As indicated in the photograph, the old-timers met at the Barnhart, conductor of the first train; P. H. Hargrave, driver of the first train; (4) George Moore, roadmaster, the only man now alive who was present at the driving of the first passenger train over Canadian Pacific or any other line into Vancouver from the East.

From the West. As indicated in the photograph, the old-timers met at the Barnhart, conductor of the first train; P. H. Hargrave, driver of the first train; (4) George Moore, roadmaster, the only man now alive who was present at the driving of the first passenger train over Canadian Pacific or any other line into Vancouver from the West.

From the North. As indicated in the photograph, the old-timers met at the Barnhart, conductor of the first train; P. H. # How Three Western Capitals Are Linked With The Early History Of Our Dominion

## Fodder Crops in Saskatchewan

Conclusions Reached At Swift Current Experimental Farm

A deal of information regarding the growth of fodder crops in Saskatchewan was to be found in the report for last year the superintendent, Mr. J. G. Tupper, B.S.A., at Swift Current Current experimental station. A few of the conclusions that appear to have been reached and that are set forth are as follows: That with the exception of corn, annual fodder crops are more dependable when grown on fallow; that few crops exceed in yield and usefulness; that annual hay crops are more certain to produce hay than grasses and legumes; that in normal seasons early maturing corn out-yields late maturing corn when comparing actual dry weight; that the selection of corn for earliness results in decrease of height in the plant, that it is not economical to harvest and use corn for feed, and that the only way in which it can be profitably used is to pasture it with live stock such as hogs or sheep; that the thinner plantings of corn generally show a greater development of root and a higher percentage of dry matter, but that when the planting is too thin the total yield of dry matter declines; that ground weeds are a serious factor in spring rice, oats and peas are the best of the annual hay crops to grow; that it is not an advantage in sowing spring crops, but that on the contrary better yields are secured from moderately late seedling; that ground weeds are the greatest of the annual weeds, but that it is not always possible to get the highest yield.

**The Other Man's Job**  
Every Man Can Make Good in His Own Sphere of Work

It is well to examine our own capabilities when we find ourselves envying the lot of others. Are we making good in our own sphere of work? That is the first test. If we are merely putting along in an undistinguished way the chances are we should do the same in any other role. In our own work we are very conscious of its difficulties and barriers. Our advancement is slow because we daily encounter the little ills and hindrances that are hidden from the outsider. But these would be much the same in any other job. If we cannot surmount them in our own case, it is unlikely we should be more successful in a position with which we are vitally unacquainted.

Excessive rains soaked the wood of a flock of sheep near Red Lake, Ont., and when the animals were killed, the stacks of hay were found to be water-soaked, and the sheep were found to be water-soaked.

Spectacles have been prescribed for a near-sighted balloon in the Circus last year.

**Canada's Population**  
According to the most recent estimate of the Canadian Government Bureau of Statistics, the population of Canada in June 1, 1926, was 9,230, 120. At the census taken in June, 1921, the population of the Dominion was 8,785,715. The most significant feature of the statistics is that the Province of Ontario has the largest population in the Dominion with 2,145,690; Quebec next with 2,051,800; Saskatchewan third with 821,090 and the other provinces as follows: Manitoba, 629,000; Alberta, 607,000; British Columbia, 468,000; Nova Scotia, 460,000; New Brunswick, 467,000; Prince Edward Island, 87,000; Northwest Territories, 8,800; and Yukon Territory, 5,400.

**Saskatchewan Wheat Pool**  
Officials of the Saskatchewan Wheat Pool announced that at the end of May 87 1/2 per cent. of the wheat acreage in that province had been signed up for the 1926-27 year, entailing the contribution of the pool until 1932. The wheat pools of Manitoba, Saskatchewan and Alberta have formed a united campaign to obtain renewal contracts.

The Cleveland police never let an officer escape a near miss on his trail and have finally rounded up a nutcracker who has been losing his 1926 Home plate for the last 21 years.

Excessive rains soaked the wood of a flock of sheep near Red Lake, Ont., and when the animals were killed, the stacks of hay were found to be water-soaked, and the sheep were found to be water-soaked.

Spectacles have been prescribed for a near-sighted balloon in the Circus last year.

**Old-Timers Meet After 40 Years**  
From the East. As indicated in the photograph, the old-timers met at the Barnhart, conductor of the first train; P. H. Hargrave, driver of the first train; (4) George Moore, roadmaster, the only man now alive who was present at the driving of the first passenger train over Canadian Pacific or any other line into Vancouver from the East.

From the West. As indicated in the photograph, the old-timers met at the Barnhart, conductor of the first train; P. H. Hargrave, driver of the first train; (4) George Moore, roadmaster, the only man now alive who was present at the driving of the first passenger train over Canadian Pacific or any other line into Vancouver from the West.

# WILSON'S FLAPADS

Will kill many times more flies for the money than any other fly-killer. Each pad will kill flies all day, every day for three weeks. At all Grocers, Drugists and General Stores—10c and 25c per package.

## WORLD HAPPENINGS BRIEFLY TOLD

Perhaps the first woman in Canada to take up aviation, Miss Ellen Wolf, is daily receiving instruction at a Hamilton aerodrome and has applied to Ottawa for a pilot's license.

Captain George L. Williams announced before sailing for Seattle that he would shortly return to Alaska to renew his explorations of the Arctic Ocean.

Hon. Mr. Justice Blodgett, of the Supreme Court of Ontario, was re-elected president of the Canadian Social Hygiene Council at Toronto for the fifth consecutive year.

The Manitoba Cycling Association has decided to send a team to Vancouver next August to compete in the Western Canada cricket tournament. The personnel of the team will be selected after a series of test matches here.

A Russian dispatch from Odessa says that eleven persons charged with espionage in behalf of Roumania have been sentenced to death by the Soviet authorities. Three others were sentenced to ten year imprisonment, while two were acquitted.

The United States Court of Appeals has reversed the decision of the United States District Court of Northern Texas which granted Frederick A. Cook, Arctic explorer, a five year probation. Mr. Cook was sentenced to 34 years imprisonment three years ago for dealing in spurious oil stocks.

Canadian authorities will be required to make the necessary inspection of pasteurization plants, dairies, stables and herds, in order to meet the requirements contained in the latest bill respecting the entry of milk and cream from this country to the United States.

Canada is "abroad" so far as the United States census law is concerned and Americans must bring back to the United States household goods and personal effects to the value of \$100 without customs duty. This is the effect of the ruling of Judge Young of the customs court.

Economy on your part would be stinginess on the part of your neighbor.

## The Most Popular Kitchen Ware

You see it everywhere—the pearl grey enameled ware that spells long service and real, old-fashioned satisfaction. This splendid kitchen ware, SMP Pearl Enamelled Ware, defies wear and tear and its surface, like all SMP Enamelled Ware, is so china-smooth and clean it harbors no taints or impurities.

You need no steel wool or special cleansers to keep SMP Ware sparkling clean. Soap and hot water do the trick in a jiffy. Made in every new handy shape and size by an old established Canadian industry.

## British Force Was Adequate

Would Eventually Have Won War Without U.S. Aid Says Earl Haig

The belief that the British armies would eventually have gained the victory in the world war, even if the United States had not intervened, is held by Field Marshal Earl Haig, commander-in-chief of the British expeditionary forces in France and Flanders from 1915 to 1919.

Addressing the British Empire Service League in strongly pronounced terms against what he described as a national tendency to belittle the part Great Britain played in winning the war.

He referred gracefully to the share of the allies but contended that, although without United States intervention the result might have been delayed it would have been the same.

The field marshal maintained that for the last 18 months of the war the armies of the British Empire carried on their shoulders the main burden of the struggle and carried it to victory.

"The national tendency to belittle our own achievements fostered and encouraged by political considerations," he declared, "has led us to ascribe our victory to the fortunate destiny of our country, to the military genius of the allies, to the mistakes of our enemies; to the intervention of America, to anything but the true cause, namely, the inherent fighting qualities of the British armies and the endurance, loyalty and discipline of British people in all quarters of the world."

"If America had not come in, we might not, perhaps, have forced the enemy to surrender in 1918, for our American reserves in existence it would have been unwise to risk throwing the whole force of the British army into the tremendous series of battles which brought the war to a sudden and, according to many politicians, unexpected end, but we should have won in the end all the same."

As for the mistakes of Germany, he said, "it was a serious error, first, when she began the war under conditions which brought in the British Empire, and, second, when she lost the war."

Canadian authorities will be required to make the necessary inspection of pasteurization plants, dairies, stables and herds, in order to meet the requirements contained in the latest bill respecting the entry of milk and cream from this country to the United States.

## Noted British Author Dead

"Three Men in a Boat" Endured  
Jerome K. Jerome, noted British author died at Northampton, Eng., from cerebral hemorrhage.

Mr. Jerome, who was perhaps best known for his "Three Men in a Boat," was stricken at Northampton while on a motor tour and was placed in a hospital. While his condition continued serious recent reports were to the effect that he had been improving and news of his death came as a shock.

The adventures of "Three Men in a Boat" which culminated in England, endeared Mr. Jerome to the English reading world at the beginning of the war, placing him in the front rank of English humorists, although the author, noted for a naive and whimsical style of style, was also identified with the stage and play writing.

Of his plays, the "Fussing of the Third Floor Back," achieved a wide-spread popularity.

After the Great War, Mr. Jerome urged "a peace without blood." With others he signed an appeal for the peace terms to be modified.

Jerome Klappa Jerome was born at Watford, England, on May 2, 1859, and was widely read in America. His last book, a biography, was one of the most widely commented upon works of the sort in Great Britain.

Believes in Aviation Future

Experiment Has Succeeded to Med-  
ical Methods Says Ananderson

In explanation, the oldest type of mankind has succeeded to the experience of modern methods of travel, and in aviation lies the future discovery of new lands declared Captain Ananderson of polar fame here arriving from Vancouver for Japan.

For this reason Captain Ananderson has abandoned any plans for further exploration and will content himself for the present with retelling of his exploits. His present journey to Japan is for the purpose of delivering a series of lectures in the principal Japanese centres.

"Exploring will all be done from the air in future," declared Captain Ananderson. "I am too old to take up flying and I do not intend to start anything which I cannot carry out myself. My trip on the Norge was a flier, I am an explorer. We did not see things alike."

"My exploring days are now finished and I prefer to leave while they were at a zenith. I have been following trails since I was 15 and I am content to leave it to the younger generation. My travels from now on into the northern country will be with a gun and a rod," he said. He also stated he was particularly interested in the Northern part of Canada above Alaska and he hoped to be able to traverse the trails in that again.

Special Classes at Brandon  
Open Only to Amateurs at Manitoba  
Provincial Exhibition

Special attention is being directed to the Manitoba Live Stock show at the Provincial Exhibition of Manitoba. These classes include sheep and both dairy and beef breeds in cattle. They are open to amateurs only, amateurs to be classed as those never having shown at a class "A" fair outside the province. The Yorkshire and Holstein breeds are to be well represented in these classes and it is expected there will be a representation of Aberdeen-Angus, Shorthorns and Herefords.

Bottled Sunshine Predicted  
That sunshine may be bottled and sent to any part of the world is a scientific possibility according to a report recently read before the Association of German Chemists in Berlin. The Germans believe that by means of huge sun engines along the Nile, solar rays can be converted into hydrogen, which can be transported to colder regions of the world in quartz bottles and later burned for light and heat.

Ramsay MacDonald "Home Again"  
Picture shows Mr. Ramsay MacDonald, Britain's Labor leader, and his daughter Isabel, being welcomed by the Mayor of Southampton on the arrival at that port of the Cunard liner "Berengaria." In the group are also Arthur Henderson and F. O. Roberts.

Making Concrete Lighter  
"Glastrig" concrete by which it added lightness is a novel idea reported from Sweden. While the concrete, a mixture of sand, gravel, and cement, is still soft, it is introduced into the mixture. This has the same effect on the concrete as yeast has on bread, filling it with small holes. The concrete produced is just as strong as the ordinary product, but much lighter.

More married women are disappointed in love than spinsters.

It is claimed that the method will make it impossible to substitute stones of lesser value for real diamonds placed in deposit, for example. The possession of the diamonds need do will be to get an ultra-violet ray picture made of them before temporarily giving up the stones and when they are returned. The method will make it possible to decide the exact quality of any diamond with almost mathematical accuracy.

Jim—"What did the jury do to the thief of the previous Hamletter necklace?"  
Ned—"Found him not guilty, but advised him to return the necklace."

What is a phonograph? Nothing more than a master barrel. And a phonograph is y e old time barber shop up to date.

## SUNDAY SCHOOL LESSON

JUNE 20

### LIFE AND LETTERS OF PETER

Golden Text, "Come ye after me, and I will make you fishers of men."—Matthew 4:19.  
Reading 1 Peter 3:11.  
Devotional Reading: Isaiah 55:12.

### A Review by Means of Allusions

Ascertain how many recognize each allusion as you read it. After a member of the class has explained the reference, ask a few questions about the allusion in which it occurs.

Self is the only prism that can ever find the sun.  
Love is the only angel which can bid the gates unroll.  
And when he comes to light, arise and follow him.  
His way may lead through darkness, but it brings to light at last.  
—Henry van Dyke.

And the voice, which came from heaven we heard when we were with him on the holy mount.—Peter.

On the spire of the bellry (with) Of metal, the friendly Mams of the spring sun.  
Gleamed, and the tongues of fire held by Apollon's aloneline.—Longfellow.

That's a S. Peter in his time of fear Deceived his master, say, and thrive, and follow him.—Longfellow.

I gave up all to follow thee— Even like him who gave up his nets To white and waves of Galilee.—Thomas Hall Aldrich.

Let all dear hearts with me rejoice, as did the saints of old When of the Lord's good angel, said, "What's a S. Peter in his time of fear Deceived his master, say, and thrive, and follow him.—Longfellow."

We shall be lifted high the strength Of self-reliance be changed at length To something nobler.—Longfellow.

A photographer makes a sensitive plate, exposes it just the rays of light, and then develops it into the light to see if his picture is there. What's a S. Peter in his time of fear Deceived his master, say, and thrive, and follow him.—Longfellow."

"We saw Germany I found professors spreading the idea that Germany is the rock selected by the Almighty God upon which to build His empire."

Your accent like St. Peter's would be very good. Did not your yellow beard and blue eyes resemble his?

We are inclined to obey him rather than God, to think more about what others will say than about how God will judge.

"You see the church can no longer stand on 'silver and gold and iron.'—Thomas Aquinas, and that great philosopher rephrased. In his turn, 'Nor can she say, 'Rise up and walk.'"

Those who last myself Endured this hardship, knowing how a broken And sinking vessel it can drag us down.  
And drawn in by the maelstrom deep, I walk these waves Restless!—Mrs. Browning.

And in the hereafter, angels may Roll the stone from the grave away.

### Invention to Test Quality of Diamonds

French Chemist Obtaining Perfect Results With Ultra-Violet Rays

M. Melval, a French chemist at the Lyons police laboratory, has invented a method to test the quality of diamonds by means of ultra-violet rays.

Various attempts have hitherto been made to measure the intensity of the fluorescence of some stones by photographic means, but solar light has always proved too diffused for accurate result. M. Melval has obtained perfect results with ultra-violet rays passed through a screen.

The purest white stones give the clearest picture, yellow stones showing darker, while imitation diamonds show dark black.

It is claimed that the method will make it impossible to substitute stones of lesser value for real diamonds placed in deposit, for example. The possession of the diamonds need do will be to get an ultra-violet ray picture made of them before temporarily giving up the stones and when they are returned. The method will make it possible to decide the exact quality of any diamond with almost mathematical accuracy.

Jim—"What did the jury do to the thief of the previous Hamletter necklace?"  
Ned—"Found him not guilty, but advised him to return the necklace."

What is a phonograph? Nothing more than a master barrel. And a phonograph is y e old time barber shop up to date.

The word "and" occurs 466,271 times in a total of 773,746 words used in the Bible.

## Life Of Early Canadian Settlers

### Primitive Life of First Settlers in Upper Canada

In this jubilee year one may content the lot of the immigrant today with his prosperity in old Canada. After the U. E. Loyalists, the earliest of our troubles, the earliest of our long wars, across the Atlantic in a sailing vessel, and travelled thence to their destination by the inland waterways or by stagecoach or by rail.

Shillness even roads were few and far between. Schools, churches, doctors were nonexistent or difficult of access. A good picture of early settlement in Upper Canada is given by the historian McMillen. He describes the matter none into the woods with no more worldly possessions than a gun, an axe and the clothes on his back.

These things, equipped, he took possession of his two hundred acres of closely-forested forest land and commenced operations. The settling of the land was a slow process, as huge tree after tree is assailed and tumbled to earth; and then, with the slow progress of the logs are partially squared and serve to build a shanty; the remainder being used for fuel.

Now the shanty. Now the rich mold, the accumulation of centuries of decayed vegetation, is gathered into little mounds, into which potatoes are dibbled. Indian corn is planted in another direction, and perhaps a little wheat. If successful, with elastic temperament, in their forest oasis like the solitary traveller over the sands of Sahara or a boat drift on the Atlantic, they are able to make a home.

When sickness comes they have to travel far through the forest to claim human sympathy. But fortunately our settlers, with elastic temperament, adapt itself to circumstances. By and by the potatoes keep up, and the wheat, with the modesty shown, their stumps around the charred maple stumps and girdled pines, and the prospect of the sufficiency of food gives confidence. A winter approaches, a deer now and then adds to the comforts of the solitary people. Such were the mass of the first settlers in Upper Canada. —London Advertiser.

### New Type of Airplane

Invention of French Pilot Operated by Compressed Air Motor

A French pilot, in an attempt to solve the problem of the engine, Ernest Bole, of Lezignan, a little town near Lyons, France, who claims to have invented a new form of flying machine, operated by a compressed air motor and six high-pressure air tubes which would permit instant inflation, built a model of his invention on exhibition at the town there. Justastopped to the motor appears a novel turbine apparatus which gives it the power to fly. It supplies which the motor consumes, thereby dispelling with any need of fuel power.

The plane resembles the Santos Dumont model in form. The model shows two transmission pulleys and two propellers, one mounted over the bow of the machine and the other below midship.

Aside from the compressed air motor which is the most important feature of this invention, the postman's aeroplane distinguishes itself from other flying machines in being able to achieve vertical elevation, and the safety of the pilot is secured through transformation of the wings into parachutes. The inventor of the machine hopes to give it a trial run at the aerodrome in Lyons.

### Germany Warns Soviets

Says Communistic Propaganda in Other Countries Should be Stopped

German newspaper correspondents, after interviewing Foreign Minister Stresemann, telegraphed, Berlin that Germany had decided to urge on Russia that it was advisable to bring to an end communistic propaganda in other countries. The German foreign minister was quoted as saying it was a great pity that Soviet Russia did unwise things which threatened the peace of the world, and he believed, however, that responsible persons in other countries did not wish to believe with Russia, though "hot heads" in some of them were demanding extreme measures.

"I was shocked to hear that Peter eloped with your wife. I always thought he was your best friend," "He is, but he doesn't know it,"—Terence Gullbin.

It would be strange if the company a man keeps didn't know him.

Misfortune often puts us wise to our own carelessness.

## The Red Cross appeals to YOU for support

SINCE the War, the Red Cross has disbursed over Seven Million Dollars for the Soldiers, Women, Children and Frontier Families of Canada.

About half of this has been spent for disabled soldiers—half in the other services of the Society about which you have been told. The Treasury is almost empty.

## \$1,000,000 Needed Now for Red Cross Work

The Red Cross brings cheer to our disabled warriors and their families. It stimulates the children of Canada to healthy living and good citizenship. It relieves suffering, and brings skilled attention to Canada's frontier districts remote from other aid. Its work is indispensable.

It now appeals to YOU, as a patriotic and humane Canadian citizen, to contribute generously to its need for funds.

Civic Building, Edmonton, Alberta

### Wanted

25 or 30 Good Weaner Pigs, Champion Meat Market.

The interior of D. W. Harper's barber shop has been painted and decorated during the week.

## Local and General

Harry Smith, of Calgary, visited his parents here this week.

Joplings have had there store front repainted during the week.

Herbert Gill will erect a residence on which operations will begin at once.

The front of G. M. Campbell's store is being repainted with M. McGaw handling the brush.

Mac Hoskins celebrated his eighth birthday on Wednesday, entertaining a number of young friends.

Miss Agnes Patterson returned home this week convalescent after an operation for appendicitis.

Rev. S. R. Hunt and E. E. Crawford attended a meeting of the Presbytery at High River on Monday.

The front of J. M. Moffatt's store and his residence have been in painter's hands this week to good effect.

A. W. Jopling returned from the Holy Cross hospital, Calgary, on Tuesday, well on the way to complete recovery.

Reports from all over Alberta regarding the progress of the wheat pool second series membership drive are very encouraging.

Considerable activity has developed in insuring against hail since recent storms. The crop is so promising that it naturally seems a pity to leave it unprotected.

A. W. Jopling, who was expected home last Friday, had not made the progress expected and his home coming was delayed for a week at least.

P. Daub and D. Ashmore put the finishing coat on W. C. Hoskins' residence this week and the complete job shows splendid results from their work.

### STRAWBERRIES

The Strawberry Season will be in full swing next week.

Our jobbers advise us that from next Monday to Thursday the berries will be in the best shape for preserving. Leave your order NOW.

### JOPLINGS

The C.P.R. gang and work train has been busy during the week lengthening the elevator switch and moving it over to the new elevator. The work is now practically completed.

Mr. and Mrs. John Cook leave on Friday for Stratford, Ont., by motor car, where they will visit relatives and friends. About three months will be required for the trip.

Barbara Dow, who has been very ill following an operation for appendicitis is now improving. Mr. Dow returned from Calgary on Monday, but Mrs. Dow still remains with the patient.

Mr. and Mrs. F. Blachly are taking a tour through the mountains to different cities in the States, while Mr. and Mrs. F. Hardisty will take charge of their farm while they are away.

Mr. and Mrs. U. G. Anderson returned home on Monday, cutting off their trip to Chicago and other Illinois points in Montana, the roads being unsatisfactory for continuing their trip at the present time.

G. H. Milliken gave the Chronicle man a pike, caught in Lake McGregor, which measured three feet in length. Good fishing is now easily available to residents of Champion, who formerly made the trip to Lake Newell for pike fishing.

"THE GREATEST FORWARD STEP

IN THREE THOUSAND YEARS"

## The Wheat Pool

H. W. Wood, Chairman, of the Board of Directors of the Alberta Wheat Pool, says that in forming this marketing organization the farmers took the greatest step forward in three thousand years.

The Wheat Pool enables wheat producers to handle their wheat in their own way and sell it themselves in their own way. The entire force of this great organization is directed towards the desired end of bettering the conditions of the western grain grower.

Every grain grower who joins the Pool now adds that much strength to the Organization. The stronger the Wheat Pool is, the better for Western Canada.

THE SECOND SERIES OF WHEAT POOL CONTRACTS ARE NOW READY.
